

for loop assignments

for loop assignments:-

Example 1: Print the first 10 natural numbers using for loop.

Example 2: Python program to print all the even numbers within the given range.

Example 3: Python program to calculate the sum of all numbers from 1 to a given number.

Example 4: Python program to calculate the sum of all the odd numbers within the given range.

Example 5: Python program to print a multiplication table of a given number

Example 6: Python program to display numbers from a list using a for loop.

Example 7: Python program to count the total number of digits in a number.

Example 8: WAP to check given string is palindrome or not. (madam=madam)

Example 9: Python program that accepts a word from the user and reverses it.

Example 10: Python program to check if a given number is an Armstrong number.
($153=1^3+5^3+3^3$)

Example 11: Python program to count the number of even and odd numbers from a series of numbers.

Example 12: Python program to display all numbers within a range except the prime numbers.

Example 13: Python program to get the Fibonacci series.

(0,1,1,2,3,5,8,13,21.....)

Example 14: Python program to find the factorial of a given number.

Example 15: Python program that accepts a string and calculates the number of digits and letters.

Example 16: Write a Python program that iterates the integers from 1 to 25.

Example 17: Python program to check the validity of password input by users.

Example 18: Python program to convert the month name to a number of days.
