

# if and if-else statment

---

**if - statment:(for only one condition check)**

**syntex:**

```
if condition:
    (if block executed when given condition is True)
    if-body.....
    if-body.....
    if-body.....
```

Note:- block may be executed.

**if - else statment:(for only one condition check)**

**syntex:**

```
if condition:
    (if block executed when given condition is True)
    if-body.....
    if-body.....
    if-body.....
else:
    (else block executed when above condition is False)
    else-body.....
    else-body.....
    else-body.....
```

Note:- Any of one block must be executed.

**if - elif statment: (for more then one condition check)**

**syntex:**

```
if condition1:
    (if block executed when given condition2 is True)
    if-body.....
    if-body.....
    if-body.....
elif condition2:
    (elif block executed when given condition2 is True)
    elif-body.....
    elif-body.....
    elif-body.....
```

Note:- Block may be executed.

**if - elif - else statment: (for more then one condition check)**

**syntex:**

```
if condition1:
    (if block executed when given condition1 is True)
    if-body.....
    if-body.....
    if-body.....
elif condition2:
    (elif block executed when given condition2 is True)
    elif-body.....
    elif-body.....
    elif-body.....
else:
    (else block executed when above condition is False)
    else-body.....
    else-body.....
    else-body.....
```

Note:- Any of one block must be executed.
