

Lambda_with_reduce()

Example: (Addition)

```
from functools import reduce

l1 = [1,2,3,4,5]
res = reduce(lambda x,y: x+y,l1)
print(res)
```

O/P:-

15

Example: (Maximum)

```
from functools import reduce

l1 = [1,2,3,4,5]
res = reduce(lambda x,y: x if x>y else y,l1)
print(res)
```

O/P:

5

Example: (Minimum)

```
from functools import reduce

l1 = [1,2,3,4,5]
res = reduce(lambda x,y: x if x<y else y,l1)
print(res)
```

O/P:-

1

Example: (Multiplication)

```
from functools import reduce

l1 = [1,2,3,4,5]
res = reduce(lambda x,y: x*y,l1)
print(res)
```

O/P:-

120
